CDS Module 08 - Business Analytics

Mini-Project 4 - July 20 (2:30 PM - 5:30 PM)

Air Quality Forecasting using ARIMA

This Mini-Project is a team activity. The Mini-Project has been released in advance i.e. on July 10, 2025, to facilitate your preparation for the activity. Each team will work in a separate Zoom breakout room for this activity. Mentor's guidance will be available during the Mini-project activity (July 20 (09:00 am - 12:30 pm)).

This is a graded **Mini-Project (10 points)**. The Problem Statement, Objective, Background, Dataset, and Steps for implementation are provided within the MiniProject Notebook (Colab). Also, there are reference links given as hints for code implementation within the notebook.

Note: The participants are required to start the mini-project on July 20, 2025 but it is not mandatory for them to finish their presentation on the same day. They can present the solution to the mini project to the mentor on July 27, 2025.

During the Mini-Project session, the mentor can be approached for guidance when there is difficulty in implementing specific steps. However, it is the team's responsibility to work towards the solution in the given time. Your team's solution notebook should be presented to the mentor, latest, between 11:30 am - 12:15 pm on July 20, 2025. The mentor will record the attendance of each team member and assign points to the team based on the final notebook. Each team member will receive the same points as given to the team as a whole. Absent team members will not be awarded any points.
