3 Reasons Why This Data Science Course is Unique

1 Learn from the Leading Faculty at IISc, India's #1 University and Research Institute*

Designed by Faculty Members of IISc's Department of Computational and Data Sciences

Taught by 5 Engineering and Management Sciences Faculty from IISc

Curated Industry Capstones, and option to Bring Your Own Project

360° Learning on TalentSprint's best-in-class Pracademic Platform

12 Month Online Live Interactive Sessions

1:1 Mentoring by Industry and Academia Experts

2 Demonstrate your expertise to get an edge in your career

Build compelling Data Stories to chronicle your learning journey

Strengthen your resume by showcasing your expertise through Data Stories

3 Reboot your career for hyper-digital economy

Get ready for a new world where Data Science is transforming business and society at an unprecedented pace

Design, build and deploy solutions to take data-driven real-world decisions

Gain the IISc Bangalore Advantage

IISc (Indian Institute of Science) tops among the oldest and the finest higher education institutes of India. It pursues excellence in research and education in several fields of Science and Engineering and is one of the first three publicly funded institutes to be awarded the Institute of Eminence status. The alumni of IISc hold significant academic and industry positions around the globe. For more information visit <https://www.iisc.ac.in>.

The PG Level Advanced Certification in Computational Data Science will be delivered by IISc’s Centre for Continuing Education (CCE) in collaboration with TalentSprint. CCE delivers courses suitably designed to meet the requirements of various target groups, eg: research & development (R&D) laboratories and industries, research scientists and engineers, to enable them to grow into competent managers of technology-intensive and data-driven organizations. For more information visit <http://cce.iisc.ac.in>.

India's **#1** University (2016-24) & Research Institute (2021-24)

IISc Data Science Course Overview

Are you a working professional looking to build expertise in Data Science? Look no further than the PG Level Advanced Certification course in Data Science offered by Indian Institute of Science (IISc) in association with TalentSprint. This highly sought-after programme offers a unique 5-step learning process, including LIVE online faculty-led interactive sessions, capstone projects, mentorship, case studies, and data stories.

Taught by world-class faculty from a global institution and supplemented with industry learnings, this 12-month programme is best suited for professionals who want to gain practical hands-on experience in solving real-life challenges. The programme teaches participants how to build powerful models to generate actionable insights, necessary for making data-driven decisions.

With an overwhelming response, this programme has enabled 750+ professionals to build Data Science expertise. Don't miss the opportunity to gain an in-depth understanding of the mechanics of working with data and identifying insights. Enroll now and take your career to the next level with the PG Level Advanced Certification course in Computational Data Science.

What Data Science can really do?

Learn from IISc Experts

Data Science Course Curriculum

Cutting-edge curriculum that reflects the latest and proven industry practices

Bridge Module- 4 weeks

- Google Colab
- Python
 - 1. Matplotlib
 - 2. Numpy
 - 3. Pandas
- Basic mathematics: Matrix, Calculus, Probability
- Basic data visualization
- Data Cleaning/Munging

Foundational Modules - 6 weeks

Module 1: Foundations of Data Science: Probability and Statistics

Overall Goal: Gaining working knowledge in the math required to understand and use data science tools

Module 2: Foundations of Data Science: Calculus and Matrix

Core Modules - 28 weeks

Module 3: Machine Learning

Module 4: AI at Scale

Module 5: Neural Networks

Module 6: Generative AI in production

Module 7: Data Engineering

Module 8 : Business Analytics

Capstone Projects - 12 weeks

Apply Now

[Download Brochure](#)

Capstone Projects

- ▶ Real-time system for Tweet Analytics
- ▶ ChatGPT based project
- ▶ Food Image Segmentation
- ▶ Talent Retention and Attrition Prediction
- ▶ Identification of Quora question pairs with the same intent
- ▶ Stock Market predictions based on Time Series
- ▶ Prediction of Client Subscription to a Bank term Deposit
- ▶ Direct Retail Marketing efforts based on Customer Segmentation using ML based Clustering techniques
- ▶ Movie Recommendation System
- ▶ Predict the future daily-demand for a large Logistics Company
- ▶ Achieving image super-resolution using a Generative Adversarial Network
- ▶ Determine key factors driving literacy rate in the Indian demography using Predictive Data Analytics
- ▶ Urban Crime Data Analytics for safety improvement
- ▶ Breast Cancer classification from digitized FNA image feature measurements
- ▶ Exploratory and Predictive Data Analytics using Indian Premier League (IPL) dataset
- ▶ Anomaly detection in Bearing Vibration Measurements

Hi-Tech Hi-Touch Hybrid Learning Platform

iPearl.ai (AI-Powered Interactive Platform for Experiential And Remote Learning), TalentSprint’s Digital Delivery Platform, truly open by design, is built on Open edX and has been architected to incorporate best-of-breed technologies and state-of-the-art components.

The hallmark of the platform is its seamless integration of diverse but related learning technologies that facilitates synchronous learning, asynchronous learning, assignments, assessments, group work, cloud labs, and video indexing, with just one single sign-on. This maximizes user delight, for both students and instructors.

Participant Profile

Experience

From Top Organizations

All logos belongs to respective companies

Schedule

- ✔ 12 Months Executive friendly programme
- ✔ IISc faculty members-led Live interactive classes, capstone projects, industry sessions and campus visits to IISc
- ✔ 335 hours of immersive learning (245 hours of classes, practicals, case studies, mini-projects, tests, campus visits and 90 hours of tutorials)
- ✔ Participants will have two campus visits of 2 days each
- ✔ Classes will be held every weekend for 2-3 hours

Eligibility

- ✔ Education: Bachelors (four years or equivalent) or Masters in Science / Engineering / Management
- ✔ Work Experience: Minimum 1 Year
- ✔ Coding Experience: Programming Knowledge Required

Note: Graduates in other stream with relevant coding experience can apply

Admission Process

- Apply for the Programme
